

Submitter: Elizabeth Relling

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

We have a ranch in Oregon. We use diesel fuel to farm. Our tractors require diesel and it is a less costly method of farming and taking care of our livestock. Diesel engines/generators last considerably longer than gas. We are off the grid because we are a remote location. We are 6th generation ranchers and intend to keep this ranch for future generations. Please do not make it more difficult and costly to make a living in Oregon.

Thank you,  
Elizabeth Relling
