

Submitter: Douglas Guddat

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

The objective of eliminating petroleum diesel in 7 years by regulatory fiat is misguided and the standards and timelines imposed are too aggressive. If you are adamant about this petroleum diesel reduction objective, please seek rather to establish market incentives for desired outcomes so that a transition to less diesel usage is enabled, in a time-frame the market can reasonably deliver, without the severe disruption likely from an early mandate.
