

Submitter: Waterman Sharon

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

As a rancher and timber owner, I urge you to oppose SB 803. It is essential we have diesel to run our equipment and trucks. Without diesel, we cannot operate. Even though the supporters of SB 803 think non-petroleum diesel is the answer, I believe the concerns need to be addressed. First, what will be the additional cost to businesses who are barely making ends meet now.? What is the impact of the non-petroleum diesel on our old equipment and trucks? Will there be adequate supply at the time petroleum diesel is phased out to have adequate supplies especially in the rural natural resource communities? Look at the whole picture and don't cave into a feel good idea. Oppose SB 803

Thank you for the opportunity to provide my opinion.
