

Submitter: Lenny Dee

On Behalf Of:

Committee: Joint Committee On Semiconductors

Measure: SB4

Oregon has multiple sites larger than 10 acres and smaller than 500 acres for semiconductor research and development facilities and related uses inside existing UGBs. Oregon has multiple sites that can offer redevelopment opportunities for vacant or struggling properties, transforming towns and cities for the better.

Oregon has multiple sites inside our existing UGBs that are 500 acres and larger.

These large sites offer the amount of land, along with other important characteristics, that are attractive for semiconductor manufacturing facilities.
