

Submitter: Nicholas Garrow

On Behalf Of:

Committee: Joint Committee On Semiconductors

Measure: SB4

The French prairie rural reserve does not have adequate sewer, water, stormwater protections, or transportation services. Plus, it is adjacent to one of Oregon's most dangerous traffic congestion points, the Boone bridge overpass. Emergency services are hampered in their ability to respond due to the congestion that is frequent on this bridge. Wilsonville should be removed from section 10 of SB4 to continue to protect the French Prairie rural reserve. Semiconductor plants are important to the United States and to the state of Oregon. But Wilsonville is not an appropriate location and deserves your protection. Thank you.
