

Submitter: Robert Youker

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

I am a retired truck driver. I drove for 43 years, long haul, cross country. If trucks are not allowed to burn diesel for fuel, what are they supposed to use as a substitute that will give similar performance and allow similar profit?

I think the sponsors of this bill need to regroup and give much more serious thought to their position and their goals.
