

Submitter: Molly Perino

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

It is absolutely critical that environmental factors are looked at from a neutral party and consideration of all the detrimental impacts that Foster Farms being allowed to move ahead will surely bring.

This small community will be utterly destroyed if this chicken operation is allowed.

Property values will plummet and there is simply no price you can place on the negative impacts this will have on families, local farms, and community.

As I understand it, this will bring next to zero jobs or benefit to community yet profit a large corporation. Foster Farms has no place in our community and certainly has the resources to vet another more suitable location.
