

Submitter: Kathleen Johnson
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB854

To members of the Senate committee on Education"

I strongly oppose SB854. We need our children to receive an education that goes back to focusing on the basics of reading, writing, math and critical thinking. We do not need them to be indoctrinated into the questionable science of climate change. Please let this be a matter to be decided on by local school boards with parental input. Our schools need to start teaching our children so that they can actually learn to read, do math and have a basis in actual facts so that they will be able to make responsible, well thought out decisions when they reach adulthood. By then, ideas on how to solve present day problems will probably have changed as well as the actual problems. The problem at this time is that our students are failing in the basics.
