

Submitter: Ruth Dallas

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB488

Dear Legislators,

I hope you will pass this bill no matter how much industry tries to lobby you out of it. It is long past time that we put people before corporate profits. Too many people have been harmed by corporations that promise safety but who pollute the air we breath and the water we drink. I hope you vote as though your own family lived near one of these incinerators. Thank you.
