

Submitter: Jan Smith

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB854

As a retired educator, I strongly oppose SB854. We need our children to receive an education that goes back to focusing on the basics of reading, writing, math and critical thinking. We do not need them to be indoctrinated into the questionable science of climate change. Maybe if it started in high school that would be a bit more palatable. Science is changing about how they view the climate, so to make a curriculum is not the way to help the kids to move into the future.
