

Submitter: Rodney Tomblason
On Behalf Of: Self
Committee: Senate Committee On Education
Measure: SB551

This bill seems a little ambiguous to me. If it applies to storage of club firearms used for educational purposes such as competitions, training etc. then why is it lumped with medications? Isn't it because you want to associate firearms with health issues? We know what 2A opponents are doing here, you are trying to associate guns with illness and disease. This is wholly inappropriate and an infringement upon a natural right.

What exactly is "specified information?" Whatever it is I know it will be used for plundering the general public. It will grow and morph into consequences that take on a life of their own.

I oppose SB551, Please dump it off where it belongs, in the garage.
