

Submitter: Greg Roush

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I am totally opposed to this measure for many reasons, oregon livestock industry is very heavily regulated as it is and we continue to feel pressure from groups and people that have no experience or expertise and are putting forth lots of misinformation. Continued heavy handed regulations will drive food production out of state and we will have to import and increase carbon footprint to bring food from out of state. Need to use common sense before regulating livestock production out of existence in Oregon
