

Submitter: Anne Bachmann

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I support passage of SB 85 because these large-scale animal farming sites are a huge source of pollution to our air and water and can negatively impact the entire region where they are located. Please be thoughtful in your consideration of this bill as it has huge consequences on the future of our region. Yes, I am a landowner near by this site. thank you.
