

Submitter: Marlene Lulay

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

We are farmers in aumsville right next to the proposed chicken farm we need to look into these large cafo chicken farms the water and air quality issues that our grandkids may be dealing with. Are you going to take care of them or anyone when these issues happen. Put on hold for all of Oregon we know they just buy property where they think they can have no issues from neighbors until there already built and running then we can't do anything. Please protect us!!!
