

Submitter: Thena Larteri-Lyons
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB891

The problem with this bill is that Physicians and NP, PA's and nurses that DO NOT currently listen to patients about wanting to use alternative approved medications to actually keep them alive.

So, do I really believe this section of the bill:

[(h)] (g) Inform the patient that he or she has an opportunity to rescind the request at any time
and in any manner, and offer the patient an opportunity to rescind at the time the patient makes
the patient's second oral request pursuant to ORS 127.840;

NO, I do not believe it. There are currently many De Transitioners that are aware that they made a life changing mistake and have a 19% higher rate of suicide BECAUSE of the choice to transition as teens. So, is this your way of "helping" them by allowing a death bill called suicide, to cover your tracks for the harm done to them in transitioning as a teenager?

Seriously? You can do better than that. How about being honest! What if it were your child?
