

Submitter: Sheila Nielsen
On Behalf Of: SB 85
Committee: Senate Committee On Natural Resources
Measure: SB85

I am very concerned with the impacts & precedent this bill would set. Farmers and ranchers deeply care about the environment- if we dont take care of it, it will not take care of us. There is no reason the things this bill seeks to evaluate cannot be studied while operations proceed. We have already seen uncertainties with our food supply chain in recent years, and putting additional burdens on farms so vital to our food supply is unwise. Please do not advance this legislation as written.
