

Submitter: Alison Kay Krochina

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Testimony:

As a Dundee, OR resident, mom, and teacher, I just want to voice my wishful wisdom that it's always most profitable in the end, for all, to place the first concern on the land and the animals as to how we utilize them.

Our concern as caretakers should always be the highest good for all to ensure our own highest good.

Let's be an example to the nation of what these standards could look like.

Let's not be cheap and stupid and waste the greatness our ancestors have acquired.

- Alison Krochina, CPRD Gymnastics Instructor
