

Submitter: Jimena Villagrana
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB854

I Jimena Villagrana Romero a student at Ridgeview High School in Redmond Oregon support SB-854

How many students are there? How many of them would take action if they knew how severe the issue of climate change is? I truly believe students must know about the things occurring to our planet, our home, our provider to us humans. Climate change is NO JOKE, more people need to be more aware of this. The planet is suffering many people don't know it, or "see it" it's a real issue. This issue will drag the human down there will be no future if it continues. If less people know the bigger the issue becomes, there will be no one doing anything to fix the problem. We need to try to avoid the future with the "what if's"

Please see this petition as an opportunity to impact the future to get more people aware of this issue. As more people know about this issue, especially the youth, the more people will be taking action.
