

Submitter: June Hemmingson

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I have been a resident in the Corvallis-Albany area since 1966. One of the reasons I moved here was the cleanliness of the streams and countryside. As the valley continues to grow in population, we need to regard our natural resources such as water as a commodity to be treasured and thus defended from harm. The proposed chicken farm would undoubtedly degrade this resource therefore I ask you to pass SB85. Thank you.
