

Submitter: Salvador Rios

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Good morning representatives,

As a graduate from Oregon State with a bachelor's in animal science I got to learn about the industries most affected by CAFO. It is imperative we allow CAFO to continue to operate as is, and allow that agency to grow and make changes as they see needed for successful operations in Oregon. We don't expect contractors to make medical diagnosis for Dr's. We have to allow the organizations created, to manage these farms and ranches, and do their job with the expertise they provide without unnecessary added tasks.

We must also consider the cost to us, as tax payers in Oregon. If you require more studies and other requirements you are spending the money of hard working Oregonians. This may not be fiscally responsible.

Thank you for your time
