

Submitter: Todd Vaughn

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB488

My name is Todd Vaughn and I live in Tiller, Oregon.

Burning this stuff is the best way to get rid of it. We burn hundreds of thousands of acres of Forests in Oregon every year because of government regulations and mismanagement. Nobody seems to be very concerned about addressing the incredible air-quality issues surrounding this, but this Bill wants to make it more difficult and/or expensive to burn a few extra tons of bio-waste. Let's get real! No on SB 488.
