

Submitter: Ayla Hofler
On Behalf Of: Banks Unity
Committee: Senate Committee On Energy and Environment
Measure: SB803

I am a small woodlands farmer, and I am beyond furious with the governments intention to destroy all rural Oregonians lives. The absolute "takings" this bill imposed is outright theft. Harvesting and replanting is our livelihood and diesel is our choice of fuel. You, appointed royalty of Oregon, must cease and desist from invading and usurping our rights: to live freely on our land and prosper. You are breaking the constitutional laws of this nation and you are surely going to invoke a civil war! We are not going to take this false narrative of yours anymore and will undue it all as fast as we can, mark my words. Take your carbon footprints elsewhere and let us keep doing the great work we do here. Yes, we even make up for all the government owned lands that burn due to zero management. We produce more wood than any other state despite you, the government. You, as a committee should be ashamed at even hearing this bill. Get out of lives, move to California, please.

From a fuming farmer ?? Ayla
