

Submitter: Donald Reynolds

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

In a time that population levels are rising, how will we produce the necessary protein to sustain this growth ? In a society that would rather stay at home and live on government

largesse, who will carry on the traditions of this type of WORK.? I find most in government have not worked a "real" job, which includes low wages, difficult people and arrogant managers.. Rural folks see no upside to living in the bubble the government employees inhabit .

There are 2 types of bureaucrats; those that focus on supporting the bureaucracy, and those that focus on the mission.
