

Submitter: Robert Egner
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB854

I do NOT support this . We need to concentrate on Reading, writing, arithmetic, history, science, trades, and other major studies in our schools. Oregon is sitting 44th out of 50 states in education!!

Sitting near the bottom of all the states in education I would expect our legislators and population to concentrate on raising our scores, participation rate, test scores etc in the major studies rather than worry about special interest education.

Maybe if Oregon public schools slowed down on teaching falsehoods, CRT, Climate emergency lies, Gender studies and other politically motivated social agendas our public school students wouldn't be deprived of honest education and be sitting near the bottom of the education pool while also having school funding through taxes larger than most states per student.

If we can't support general education you have absolutely zero right to push for anything other than better support for just that....General Education!!!

Vote NO on this special interest bill and instead support real, honest education and ensure we design our existing programs, existing curriculum, existing trades in a way that our students Excell.

Thank you for your time and educated vote against this bill.

Robert Egner
