

Submitter: Joyce Wall

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB854

“I strongly oppose SB854. We need our children to receive an education that goes back to focusing on the basics of reading, writing, math and critical thinking. We do not need them to be indoctrinated into the questionable science of climate change.” It's amazing that you can't teach the children basic's, but you can teach everything else. You are dumbing down each generation even more...Shame on you! Let their families teach them if they feel so inclined about climate change, let the shools teach the things that will help them get a job!!!!
