

Submitter: Tim Nelson

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB854

Absolutely not,it's a fraud,and I'm pretty sure wind and solar are the most expensive and have the least dependability,,,show them videos of the children in the cobalt mines so you can have ev battery's, wich there's no way to dispose of that I'm aware of. Teach them how wind mills kill the birds,and disposing of then has another set of problems,,,and finally teach them how China and India are the greatest polluters on earth,and don't give a crap,,,,get back to teaching the basics
