

Submitter: Louisa McCleary

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I do not want to see Oregon sullied by factory farms. This state has a long and proud tradition of small and medium size farms that raise for us and the rest of the world some of the best food anywhere. I think we are also a state grounded in kindness, and do not want to see us allowing the cruel conditions that factory farmed animals are subjected to. I want to see family farms flourish, and our meat and dairy produced as humanely as possible. This will never happen with mega-dairies and industrial meat production, which also horribly pollute their surroundings, while they put small farmers out of business. Please pass SB 85.

Louisa McCleary
