

HB 2904

I'll make this short & sweet, it's unimaginable how two primates in cages could possibly be overlooked when running their cages through scalding hot water. This is so egregious & impossible to understand. Those animals already (needlessly) suffer in many cases only to have that happen. Animals are sentient beings, they feel, they care for their families. Caring humans don't let this happen, never again. Please support HB 2904. We've got to have more oversight in the care for those that can't speak for themselves.
