

Submitter: Robert Morin

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

This bill is a precursor to removing fossil fuels in Oregon. We are not California!! EV's are not the answer to supposed global warming. 1 degree C in 175 years of fossil fuel use is not a crisis.

Globally, fossil fuels have been much more beneficial to mankind than detrimental, but the benefits are never discussed and or highlighted in the discussion. Completely dishonest.
