

Submitter: Todd Vaughn

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB854

I strongly oppose "climate change indoctrination" in our schools. Climate change is part of the earth's natural cycles and therefore does not need to be discussed in the classroom in any other manner. This is another attempt at forced mental manipulation that leads to the acceptance of "woke" lies and propaganda. Stop indoctrinating the children, and give them a classic education... Reading, Writing, Math, and Biology, History, and Science that are not driven by leftist political agendas! Enough with the 'woke requirements'.
