## **Copay Assistance Diversion Programs**

## **Copay Accumulators 101**

Millions of Americans endure long and expensive medical journeys to get the medications that best treat their needs. Copay accumulator adjustment policies and copay maximizer programs are schemes from insurers and pharmacy benefit managers (PBMs) that prevent patient assistance funds from counting toward a patient's out-ofpocket maximums, or deductibles. These policies undermine patient access to life-saving prescription drugs, making it more difficult for people living with serious, complex, chronic illnesses to adhere to a treatment plan.

protect vital patient assistance

### Findings for Oregon 2023 Marketplace Plans

A new report by The AIDS Institute shows that 4 out of 6 plans in Oregon have copay accumulator adjustment policies that harm vulnerable patients.

- These plans have copay accumulators: BridgeSpan, Moda, PacificSource, Regence.
- These plans do not have copay accumulators: Kaiser, Providence.

Oregon has received a **D** for failing to protect patient assistance because **66.7%** of marketplace plans have copay accumulator adjustment policies.

#### **Need for State Action**

Oregon can join 16 other states to protect residents from these harmful practices by insurance companies and PBMs.

AR, AZ, CT, DE, GA, IL, KY, LA, ME, NC, NY, TN, VA, WA, WV, and Puerto Rico have enacted legislation that requires insurers to count third party payments, including copay assistance, toward patient costsharing limits.

The All Copays Count Coalition suggests the following bill language for Oregon to combat this problem: "When calculating an enrollee's overall contribution to any out-of-pocket maximum or any cost sharing requirement under a health plan, an insurer or pharmacy benefit manager shall include any amounts paid by the enrollee or paid on behalf of the enrollee by another person."
