

Submitter: Mary Frost  
On Behalf Of: All living things in Oregon  
Committee: Senate Committee On Natural Resources  
Measure: SB85

Please stop these factory farms in Oregon. We already have the MOST polluted waterways in the country. Is this what we are? Oregon has always prided itself on being a clean energy state. Do we really want to be known for our filthy water because of money?? I want my grandson to grow up and be proud of living here not embarrassed or worried because he can't drink clean water. I think we have to look back at Tom McCall. He'd NEVER have allowed this to happen because of greed. This must stop now! Thank you. Mary Frost
