

Submitter: Richard Peil

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB854

We need to stop the madness of turning our public ally funded schools into centers that focus more on indoctrinating children than educating them in reading, writing, arithmetic and critical thinking skills. Students that are taught these skills will be more than apt at critically discovering problems and seeking solutions to those problems at all levels. I strongly oppose this bill- please direct our tax funds to traditional core curriculum education.

Richard
