

Submitter: Chuck Wiese
On Behalf Of: Self
Committee: Senate Committee On Education
Measure: SB854

Stop this horrible nonsense at once! This bill is another brainwashing travesty of bashing true scientific principles and substituting political nonsense in their place.

ATMOSPHERIC CO2 IS NOT CAUSING THE CLIMATE TO CHANGE! There has been no evidence ever presented to date that proves this is true because the effects of atmospheric CO2 are dwarfed by the Earth's hydrological cycle. This has been known for many years and only supplanted with failed climate models to try and assert otherwise. This twisted version of science is being fronted in education for political purposes only and the behavior of the public university system is willfully participating in this for monetary gain oin the foirm of worthless "research" grants which are used to support this political nonsense.
