

Submitter: Tina Teel

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

As a concerned citizen the impact that this would have on farms, rural communities, small towns and businesses that use generator systems for backup, small businesses such as logging businesses or construction businesses would not be able to withstand the financial impacts and would then in turn be forced to pass it on to the consumers or towns folk. This bill is a financial disaster.
