

Submitter: Heather Hall

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB854

Vote NO on SB 854. I strongly oppose SB 854.

Who holds the truth about climate change? There has been a continued debate over the years, and the science is never settled. Opinions are based on worldview and taught as facts, used to manipulate individuals, and works to shape kids' minds towards a political agenda. That isn't education--that's indoctrination to form kids into a "desired" type of voter for political gain.

The climate changes and will continue to change. It's far above mankind's ability to control it.
