

Submitter: Donna Harlan  
On Behalf Of: The Harlan Family  
Committee: Senate Committee On Natural Resources  
Measure: SB85

Hello friends, please open your hearts & minds to every sentient being we are blessed to co-exist with on our brief earthly journey. Apparently mankind has been blessed with so-called greater intelligence to compensate for our appalling lack of compassion for other living things. All that you put into the lives of others will come back into your own. That is a moral certainty. Why add to the misery & suffering & wanton destruction of our deeply troubled country, world, earthly home??? Stop the truly shameful & cruel greed of factory-so-called-“farms”. Speak-up for those of us w/o a voice, a choice, nor power. Say NO to adding these filthy, heartless, death “farms” now. Maybe then your dreamscape will hold you in safe-keeping. And not become nightmares that will haunt you forevermore.
