

Submitter: Derek Becker
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB854

Members of the Committee,

I strongly oppose SB 854. We do not need more indoctrination of our children. Virtually all of the predictions of doom and disaster due by anthropogenic global warming / climate change have failed to come to fruition. From Michael Mann's debunked "hockey stick" graph to the seas engulfing the coastal areas, all are gross exaggerations, if not outright lies. If not why would President Obama have purchased a house on the ocean? To quote Oregon Citizens Lobby, "Who holds the truth about climate change? Science is never settled, and it requires facts. There is a documented statement from the U.N. that the climate crisis was invented to suck money out of nations. Climate changes mostly due to the cycles of the Sun, but to use it for indoctrination and propaganda to shape the mind of kids towards a political agenda is not education.

Please vote no on SM 854

Respectfully
