

Submitter: Dan Sandau

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB789

Canola is an open commodity, which serves as an alternative crop to our grass seed crops. It's a crop that can be No-Tilled for production. It also helps with controlling weeds, small pests, and insects for our grass rotation, because of using different pesticides. Not to have alternatives for planting and the loss of pesticides will cause us to stop No-Till and work the ground. This will increase erosion considerably. Our farm is in the Silverton Hills which does not have much topsoil. In time this ground will loose production.

How is it that the restrictions of a commodity is not a violation of my constitutional rights. This country exists for freedom, this is a violation of my freedom. So what is freedom worth? That we sell out ones freedom so others can have increased profit. What price was paid by those at Arlington national cemetery. So what do you stand for Freedom, Country, constitution or money.
