

Submitter: Ashley Johnson

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB3214

Animals and humans are not owned by the government, they are safely transported, we are so thankful to have transportation like this. If we can not transport animals, than we should not be flying as humans. The transportation we have is definitely safe for animals and allows us to transport them away from carry ons abs safely to their destination and humanely. I have never lost a animal yet and they are all very happy and healthy. In addition to this.. what if one had to live and all they had was their animal which is very special. You help them travel safely with that animal.
