

Submitter: Chandra Reynolds

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB789

To: Senate Natural Resources Committee

I am frustrated that it is easier for farmers in the Willamette Valley to grow marijuana than it is to grow canola! That is ridiculous. I would love to drive through Burgerville and see the picture of a farmer I know proudly displayed on a poster, that has helped supply them non-GMO canola oil. With a the prospect of a 500 acre permanent cap and thus such limited supply, a company like that could never even look into such a relationship.

Please oppose Senate Bill 789. Let free markets work.
