

Submitter: Aaron Sandau

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB789

There should not be any restrictions on what we grow on our private property. This would set more of a precedent of making future restrictions on our lands. This is a good crop to transition with and rejuvenates the ground for our primary crops. It is also good for oil and feed by product for live stock. Please do not limit options for growing crops that helps us.
