Joint Legislative Committee on Semiconductors

January 30, 2023

Mayor Travis Stovall Keith Leavitt

Mayor, City of Gresham Port of Portland

SEIZING OPPORTUNITY

Initial Report and Subcommittee Findings

Oregon Semiconductor Competitiveness Task Force

August 2022

Key Findings of the Industrial Lands Subcommittee

Oregon must have development-ready sites for the semiconductor industry in a range of sizes, configurations and locations:

- Two (2) sites of 500+ acres
 - advanced R&D or production fabrication operations
- Four (4) sites of 50-100+ acres
 - Device manufacturers or equipment manufacturers
- Eight (8) sites of 15-35 acres
 - key suppliers to the ecosystem

Recommendations for the Legislature

- Prepare and maintain a comprehensive statewide industrial lands inventory
 - focused on opportunities in the semiconductor industry but also advanced manufacturing across all corners of Oregon
- Support the legislative concepts proposed by DLCD (POP 207) and Business Oregon (L.C. #357).
 - The funding for site readiness tools required to be competitive, however, needs to be substantially higher than called for in either of these concepts.
- Create a strategic manufacturing fund within Business Oregon as part of the State's Regional Industrial Site Readiness Program (RSIS).
 - Capitalize the fund this legislative session with an initial fun of at least \$300-500 million.
 - Limit application to land aggregation and site readiness for sites suitable for the semiconductor industry
 - The fund should be expanded to jump-start advanced manufacturing industries statewide

Why the Port is Involved

- Leadership in industrial land and international trade
- Semiconductor industry critical to trade
- Advanced manufacturing = a more equitable economy
- Opportunity requires we are "all-in"

OREGON EXPORTS

Semiconductor Manufacturing

\$12.9 B Oregon Semiconductor Sales in 2019

Largest Producer in the U.S.

2nd

\$10.5 B

Industrial Sites in Areas of Focus

Oregon

Most suitable sites for semiconductorrelated use

Semiconductor Siting Criteria

CRITERIA R&D and/or fab		Device manufacturers or major semi. Equipment manufacturers	Key suppliers to semi. cluster					
Acres	500+	50 - 100	15 - 35					
Site Building Ready	18-24 months	12 months	6 months					
In UGB	Y	Y	Y					
Zoning	Industrial	Industrial	Industrial					
Distance to Int'l Airport	< I hour	< 2 hours	< 1 hour					
Distance to Major Hwy < .5 miles		< .5 miles	< .5 miles					
Distance to Industry Cluster		< 2 hours	< 1 mile					
Electricity Demand	100 - 300 MW	10-100 MW	1-5 MW					
Site Slope	< 4% preferable	< 4% preferable	< 4% preferable					
Existance of Wetlands	delineation complete, mitigation plan in	delineation complete, mitigation plan in	none					
Water Demand 10-40 mgd		1-10 mgd	1 mgd					
Water Line Size								
Sanitary Sewer Demand	anitary Sewer Demand 10-40 mgd		1 mgd					
Sewer Line Size								
Region population	capable to support 10,000 + employees	capable to support 2,000 + employees	capable to support 500 + employees					
	plan in place, funding	plan in place, funding						
Site infrastructure	identified	identified	in place					

Key Findings

	Recommended by Semiconductor Task Force
R&D Campus and/or fab +/- 500 acres	2
Device manufacturers or Fab./Equipment Supplier 50-100 acres	4
Key Materials Supplier 15-35 acres	8

Key Findings

	Recommended by Semiconductor Task Force	Finding	Location
R&D Campus and/or fab +/- 500 acres	2	0	
Device manufacturers or Fab./Equipment Supplier 50-100 acres	4	7	 Albany Within 2 hours of PDX Columbia City No proximity to industry cluster. Ready within 6 months Millersburg (3) Within 2 hours of PDX St Helens No proximity to industry cluster Ready within 6 months. Woodburn
Key Materials Supplier 15-35 acres	8	1	Same Woodburn site
