

To whom it may concern :

I have had numerous life altering health issues the past 5 years . The Natropathic doctors I have seen have been instrumental in helping me return to work , restore my mental and physical health and address issues from an integrative approach.

These doctors are pouring their hearts and enormous amounts of energy into the health and well-being of our community. Their ability to help people is widespread and has a tangible effect on keeping people as healthy members of society and creating balance for us all .

Many of them have had to dedicate close to a decade of their lives to school and taken out loans of up to 200,000 dollars . Health is everything and they deserve equal pay that allows them to continue doing the amazing work they do .

Anyone who has seen a natropath can attest to this .

I urge you to realize the ripple effects and far reaching contributions they are making . They are a vital part of progressing our society in more aligned and productive ways.

Thank you  
Kindly ,  
Sunnie Elliot
