

Submitter: Bill Mason

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3152

Removing the choice for consumers of reliable heating, cooking and transportation resources such as natural gas is unacceptable. The ice storm on 2020 that left untold hundreds of thousands of people without heat and a way to prepare food because of a non functioning electrical power grid. This outage demonstrates clearly that the electric infrastructure does not support our people. Electric only is a poor choice. Please table this bill and let it die.

Thank You.
