

Submitter: Kat Balogh  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure: HB3213

Dear House Committee on Judiciary,  
Please support HB 3213 and ban cosmetic testing on animals! I am so excited that this bill is in committee - it is long overdue! Animals continue to suffer horrendously in the name of products for our vanity. Cosmetic companies do not need to continue testing on animals as these ingredients have a long history of safe use. New ingredients can be tested with alternative methods that are more relevant. I understand there are 50 types of tests available and more and more in process of development. So why do we continue to torture rabbits, mice, rats guinea pigs, many of which species are human pets and family members.

Thank you in advance for supporting this bill.
