

Submitter: Justine DeArmond

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3152

Please vote no on this bill as it would negatively impact low-income families and senior citizens the most, and make us all more dependent on an already fragile and overwhelmed electrical grid. Seems obvious that people should be able to eat, heat their homes and run their businesses. Energy choice matters especially to people who can't afford new electrical appliances. The Governor must approve of gas right, since she just got a fancy new gas generator installed at the mansion....
