

Submitter: Richard Lemer

On Behalf Of: 5 members of our family

Committee: Senate Committee On Natural Resources

Measure: SB85

I support this bill to stop factory farming in Oregon. Factory farming is harmful to our environment, the people, and it is a cruel existence to the millions of animals who must endure factory farming.

We need to give respect to the animals whose lives are taken for our food. They must not be mistreated by cruel and inhuman practices and people.

Demand better for clean water, clean air, healthy people and well treated animals.

Thank you

Richard Lemer and family
