

Submitter: J ievins

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I support the measure SB 85 to stop allowing factory farms in OR. We can set an example for those states that are even more heavily invested than is OR. This practice has never been and never will be healthful for either animals or people. The new breed of farmers generally wish to reinstate old methods--diversification and less invasive practices on our earth. We must support our dedicated farmers by disallowing the large spreads which currently have more access to the markets.
