Measure: HB2004

Honorable Representatives:

As a registered voter that participates in every election, I am opposed to Ranked Choice Voting (RCV). A republican party plank is opposed to RCV. It is a complex system to reshuffle choices of votes that will disenfranchise voters in the selection of persons to represent the people of the state in various local and state positions. People question the integrity of the current voting system and this proposed change will bring even more questions to the clear choice of elected persons. When the system cannot determine the amount of separation between support of candidates, it determine the relative desire of a voter between the candidates. Thus the percent of persons voting will likely decrease with this system and will completely alienate a major political party that is on record as being opposed to this questionable system of voting. I strongly oppose the passage of this bill.
